A New Way to Pay for Healthcare
Addressing access and costs for patients

[Andhra Pradesh MedTech Zone (AMTZ), Vizag, India]:

Snark Health has been selected to participate in the 2024 World Health Innovation Fellowship (WHIF).

The World Health Innovation Fellowship plays a pivotal role in expediting global health innovation by serving as a crucial platform for nurturing cross-country partnerships, facilitating the exchange of knowledge and mobilizing resources to tackle the intricate health challenges of the 21st century.

Fellows from diverse backgrounds worldwide are invited to address healthcare obstacles through the development of ground-breaking solutions, with the program's success gauged by the effective deployment of these solutions in their native countries. The objectives of the fellowship encompass fostering dialogue, collaboration, and innovation, organizing forums, and contributing to global health policies through impactful solutions.

Leveraging the state-of-the-art facilities and global mentorship provided by AMTZ, this fellowship drives innovation and collaboration in the realm of global health. Fellows commence their projects on July 1st at the AMTZ Campus, where they have access to a comprehensive ecosystem comprising of 3D prototyping laboratories, Electronics labs, Pre-Compliance Testing Labs, Biological Kit Validation Labs, EMI EMC testing facilities, Gamma and ETO sterilization units, among others.

The culmination of the fellowship occurs with fellows presenting their solutions at the WHIF event hosted in December at AMTZ, attracting participants from across the globe. The successful completion of the fellowship hinges on the implementation of solutions in fellows' respective countries.

The Snark Health application is available for download at no cost on Google Play (Patient App: <https://bit.ly/snarkpatientapp> ; Doctor App: <https://bit.ly/snarkdoctorapp>).

About Us: Snark Health's mission is to improve access and lower costs for patients. We do this through our Hippocratic Coin® alternative payment model using at-risk contracting, liquidity pools, de-identified "data as a common resource" and our novel health savings vehicle without the need for health insurance. Patients pay a sliding scale down to \$0 to see a doctor. If a doctor charges \$0, then the doctor earns the majority of the data monetization. If a doctor chooses to be paid, then Snark Health or liquidity provider is the payer and earns the majority of the data monetization. If a patient pays the consultation fee, then the data monetization earnings are split between the patient, doctor, and Snark Health. Visit <https://snarkhealth.com> to learn more.
